

## IN THE CLAIMS

Claims 1-12 (Canceled).

Claims 13-33 (Canceled).

Enter new claims 34-45 as follows:

34. (New) A method for displaying a web browsing history, said method comprising the steps of:

displaying a list of names of web sites visited by a user, said list of web site names being displayed in an order based on a time since last visit by said user to the respective web site; and

displaying next to each of the web site names a respective graphic whose intensity corresponds to the time since last visit by said user to said each named web site.

35. (New) A method as set forth in claim 34 wherein the intensities of said graphics increase as the times since last visit by said user to the corresponding web sites decrease such that a graphic for a name of a web site which was more recently visited by said user is more intense than a graphic for a name of another web site which was less recently visited by said user.

36. (New) A method as set forth in claim 34 wherein said graphics have a color other than a shade of gray.

37. (New) A method as set forth in claim 34 wherein said graphics adjoin each other to form a generally rectangular region perpendicular to said web site names.

38. (New) A method for displaying a web browsing history, said method comprising the steps of:

displaying a list of names of web sites visited by a user, said list of web site names being displayed in an order based on frequency of visits by said user; and

displaying next to each of the web site names a respective graphic whose intensity corresponds to a frequency of visits by said user to the respective named web site.

39. (New) A method as set forth in claim 38 wherein the intensities of said graphics increase as the frequency of visits by said user to the corresponding web site increases such that a graphic for a name of a web site which was more frequently visited by said user is more intense than a graphic for a name of another web site which was less frequently visited by said user.

40. (New) A method as set forth in claim 38 wherein said graphic has a color other than a shade of gray.

41. (New) A method as set forth in claim 38 wherein said graphics adjoin each other to form a generally rectangular region perpendicular to said web site names.

42. (New) A method for displaying a web browsing history, said method comprising the steps of:

displaying a list of names of web sites, said list of web site names being displayed in an order based on a degree to which each named web site matches a key word search initiated by said user; and

displaying next to each of the web site names a respective graphic whose intensity corresponds to the degree to which each named web site matches the key word search initiated by said user.

43. (New) A method as set forth in claim 42 wherein the intensities of said graphics increase as the degrees to which the named web sites match the key word search initiated by said user such that a graphic for a name of a web site with a first degree of match of the key word search is more intense than a graphic for a name of another web site which has a second, lesser degree of match of the key word search.

44. (New) A method as set forth in claim 42 wherein said graphic has a color other than a shade of gray.

45. (New) A method as set forth in claim 42 wherein said graphics adjoin each other to form a generally rectangular region perpendicular to said web site names.
